Roberta Taylor, PharmD, Secretary; & WMSHP Programming
Committee

Learning Objectives:

After participating in all sessions in this activity the pharmacist participant will be able to:

1. Given a medication safety scenario, recommend a basic pharmacoeconomic evaluation design.
2. Discuss the pharmacotherapy for exacerbations and progressive symptoms of COPD.
3. Discuss the available data related to the use of dual antiplatelet monotherapy and combination therapy in patients with coronary artery disease.
4. Delineate the role of new insulin therapies, GLP-1 agonists, and SGLT2 inhibitors in the treatment of diabetes mellitus.
5. Summarize the evidence for the use of novel oral anti-coagulants and warfarin in stroke prevention
6. List sources of medication error prevention policies related to pediatric patients.

Successful completion of this activity requires signing in on the signature sheet, participation in all sessions, submission of an attendance record, and completion of an online activity evaluation survey. Participants must attest to participation in all sessions. Partial credit will not be provided.

Target Audience: Pharmacists and Other Health Professionals

Activity Type: Knowledge

Universal Activity Number: 0025-9999-16-060-L01-P

Total Credit Hours: 6.0 (0.6 CEU)
