FACULTY

Rupal Mansukhani, PharmD, FAPhA, CTTS

Clinical Associate Professor

Ernest Mario School of Pharmacy

Rutgers University, The State University of New Jersey

Piscataway, New Jersey

EDUCATIONAL OBJECTIVES

- Examine the pathogenesis and modes of transmission of influenza, as well as factors contributing to greater risk of influenza-related complications in certain patient populations
- Compare the mechanisms of action, dosing, clinical benefits, and adverse effects associated with the antivirals recommended by the CDC for the influenza season
- Identify the role of health-system pharmacists in making clinical recommendations and in counseling patients about the use of antivirals for the prevention and treatment of the influenza virus

Pharmacy Times Continuing Education™ is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education. **This activity is approved for 1 contact hour (0.10 CEU) under the ACPE universal activity number 0290-0000-20-235-L01-P. The activity is available for CE credit through January 11, 2021.**

Type of Activity: Application

This activity is supported by an educational grant from Genentech, a member of the Roche Group.

FACULTY

Rupal Mansukhani, PharmD,

FAPhA, CTTS, is a Clinical Associate Professor at the Ernest Mario School of Pharmacy at Rutgers University (2005-present). She completed her doctor of pharmacy degree at the Philadelphia College of Pharmacy (2004). Upon graduation, she

completed a PGY 1 Community Practice Residency at the University of Illinois in Chicago (2004-2005). She worked in community practice at Pathmark Pharmacy (2005-2012), where she taught students about clinical outpatient services. She currently practices at Morristown Medical Center in Transitions of Care (2012-2020). Her areas of interest include respiratory conditions such as COPD, asthma, and pneumonia with a special interest in advancing immunization rates. Advancing patient care and promoting pharmacy through research, scholarly activities, and presentations have also been fundamental to Dr. Mansukhani's approach to moving the profession of pharmacy forward. She has presented her research local, regional, national, and international meetings. She is passionate about teaching and continues improve immunization rates within her state.

Faculty disclosures will be provided prior to the presentation.
